9.	John Glerum	Boise, ID	Gowen Field is not prepared to deal with major increases in noise and air pollution. Once this is know it will take decades to correct. And the fuzzy math "economic benefits" only do not tell the true economic impact. Our City and State Officials must be held accountable for their actions. The Air Forces Environmental Impact Study (should Boise be chosen) will not deter the F35s being based here.
10.	Mark Llitas	Boise, ID	it affects where I live
11.	Brian Davis	Boise, ID	
12.	Helen McGill	Boise, ID	Too many residents live close to Gowen Field and more homes are being developed here. This would be a detrimental change to our neighborhood. Thank you, Helen McGill

14.	Heinrich Wiebe	Boise, ID	Noise pollution at this level will render Boise unlivable.
15.	Kris Query	Boise, ID	
16.	Barbara Cochran	Boise, ID	They are too loud and toxic for a "Livable City" and there is a full on air force base 35 miles away! Environmentally, economically, emotionally unwise.
17.	Barbara Ginsberg	Boise, ID	
18.	Melanie Hall	Boise, ID	I live near here and this would ruin my house!!

22.	Jeanne Wilson	Boise, ID	The F35 will ruin Boise. It will cause extreme noise pollution, air pollutants, and a danger to the residents of Boise if an F35 should crash. Boise is never going to be listed as one of the most livable cities if the F35 is based there.
23.	William Gilbert	Boise, ID	We have lived in the flight pattern for 50 years. The addition of F-35s will render our house inhabitable. We would not receive enough money from our house to relocate.
24.	Edward Bracht	Boise, ID	noise and vibration will be disturbing. no reason not to go to Mountain Home

28.	Lin Paporello	Boise, ID	Luv the military, the F-35 are not a fit for our valley.... lets look at other alternatives!
29.	Fran Ciarlo	Boise, ID	These jets have NO business flying over Boise. Period.
30.	Frirz Kiefer	Boise, ID	
31.	Brenda Tornga	Boise, ID	Because this is my neighborhood and I am tired of the Boise officials disregarding the health and livelihood of our neighborhood to put crap here that we don't want or need - all under the subtle purpose of the greedy dollar sign.
32.	Karen Moore	Boise, ID	The noise and air pollution as well as lowered quality of life for residents that this proposal will create is not worth the potential short-term municipal financial gain.
33.	Ammi Sheeder	Boise, ID	Not a good fit
34.	Jeanine Schaefer	Boise, ID	
35.	Christiane Rudd	Boise, ID	Continuing to expand Gowen Field with massively noisier planes than we have now will decimate my neighborhood, Hillcrest Country Club area, as well as fill the Treasure Valley with unbearable noise and jet fuel pollution. Major fighter jets, like the F16s and F35s, belong in Mountain Home, a short 49 miles from Gowen Field, and an actual air force base purpose built. The Boise Airport is a successful urban airport, and should not be treated as an air force base for fighter jets.

42.	susan berry	boise, ID	This airplane is not a good fit for a residential airport. It will have a negative impact on the Treasure Valley and is not worth the \$\$\$ that our elected officials think that it will contribute to our economy.
43.	Phil Lansing	Boise, ID	Military dollars are economic junk food. Let's have real community investment and shared quality of life.
44.	Alicia Emery	Boise, ID	My kids go to a school that is in the inhabitable section for noise. How are they to learn if you can't even live in that area. My home is a few hundred yards off the line of inhabitable. I can't believe a few hundred yards is going to make it that much more habitable. I feel like the valley is too small for these jets and that nowhere is habitable when they're flying.
45.	Lyn Tozer	Boise, ID	for the reasons stated.
46.	Thomas Campbell	Boise, ID	Afterburner aircraft are no longer appropriate for regular schedule flights over the 2 largest populated cities in the state!
47.	Scott Gregory	Boise, ID	I believe that stationing F35 flying missions out of Gowen Field will harm the livability of our community and be a detriment to the citizens of south Boise and all of Boise. Please consider other options, including moving the airstrip further south or stationing them in Mountain Home.

50.	Dolly Higgins	Boise, ID	I love Boise's quality of life. I am an USAF vet, and I know the damage this will do to our way of life. However, I support basing the F35 in Idaho - near Mt Home or in another less urban area.
51.	Gayle Chalfant Gayle	Boise, ID	
52.	Suzanne Troje	BOISE, ID	
53.	Adora Fulkerson	Boise, ID	I come from a military family and living next to Gowen and hearing the current military jets has never ever bothered me. The noise is occasionally loud but not anything we cannot live with so they can properly train. The F-35s however, would be too much and the noise levels too high for a densely populated area. Schools and private households in this neighborhood would be negatively impacted. I truly believe the USAF needs to consider options in better suited areas.
54.	Dani Yi	Boise, ID	I truly appreciate what the Air Force does for our country! However, I would also like to stay in my home that I've lived and raised my children in for the last 10 years. I am in the flight path and so are THOUSANDS of other homes that will <i>(continues on next page)</i>

54.	Dani Yi	Boise, ID	<i>(continued from previous page)</i> be affected by the noise level and will have to move. Not to mention the schools that will also be affected!! I agree that another place in Idaho may be more suitable for these jets, like Mt. Home or somewhere more RURAL... NOT in an already established city, "tearing up homes" to allow these jets to come. Our city is prime for people to want to come and live here. Let's keep it that way.
55.	David McColly	Boise, ID	Livability in my home
56.	keith mitchell	Boise, ID	Not the correct placement for the F-35. It'll change Boise for the negative. Too much noise and pollution! Economically it will not help....it'll help deplete.
57.	Chris Wylie	Boise, ID	The F-35 is very loud and will negatively impact many neighborhoods. If trying to sell, some homeowners close to the airport will be legally required to notify any potential buyer about the noise problem! Boise's airfield is much closer to town than all the other placements sites under consideration making it the worst possible location. For those touting the 'Sound of Freedom', I also consider it 'patriotic' to stand up for my neighbors property rights.
58.	Sharon B.	Boise, ID	The quiet quality of life that we enjoy today will be ruined if the F35's are allowed to fly out of Boise. The noise pollution will destroy the peace and quiet that we enjoy here in Boise. If they must be in Idaho, then base them out of the air field base in Mountain Home.
59.	Betty Bermensolo	Boise, ID	As a 20 yr veteran I wanted to personally research the F35 mission for the Boise Airport . I am convinced that the noise and pollution level is not compatible with the existing runways for quality livability in our community. The F35 would be a better fit at the Orchard Training Facility or Mountain Home AFB.
60.	Bill McNew	Boise, ID	
61.	Trish Raffel	RALEIGH, NC	
62.	Heidi Dean	Boise, ID	This jets will pollute the valley with fumes and an undocumented amount of noise. This would destroy Boise's livability and it's growth.

70.	Gerald Rudd	Boise,, ID	As a former jet pilot (Navy-1954-60) I can legitimately testify that the noise of jet fighters is DEAFENING and are TOTALLY UNSUITABLE FOR DOWNTOWN AIRPORTS like Boise.. The mayor and city council that support this project should be made to live within the noise boundary of the airport and live with this nerve shattering noise level and I promise you it would be quickly reversed!!
71.	HEATHER RODMAN	Boise, ID	I live here, and the F-35 is quite simply NOT suitable for residential areas! Our local government is doing shady things to try to get it here, but no one who actually lives in the affected zone wants it here. Please help the citizens of Boise stop this!
72.	Kyle See	Boise, ID	I don't want to hear that noise pollution
73.	Darcy Bellamy	Boise, ID	I moved to boise for the quality of life. The airport has already gotten much more noise in the last two years. The airport proximity to town and the F-35 are not compatible with making Boise a liveable city with high quality of life. Put the Jets in Mountain Home where they belong
74.	kate lynde	Boise, ID	the quality of life in our beautiful valley is impacted by the noise and air pollution of this war machine...not necessary!

76.	Lauretta Cecchino	Boise, ID	Noise & loudness
77.	Marv Askey	Boise, ID	I am concerned about the need to expand the noise foot print of the Boise airport to accommodate F-35's and/or F-15's, the number of homes designated NSFRU, the impact on Hillcrest CC.
78.	Jim Chalfant	Boise, ID	
79.	James Thiele	Boise, ID	My home is at Cole and Overland. Fighter jet noise viberates my windows and conversations in the house has to stop till after the jets get far enough away to continue the conversation.
80.	Joy Christianson	Boise, ID	The noise factor for this area is TOO MUCH! Especially when you consider we have a perfectly logical place for them at the Mountain Home Air Force Base. Placing them at the MHAFB would help solidify the need to keep the base in Idaho, thus keeping the \$\$\$ in Idaho. It is the State that would benefit not just Boise.
81.	Barbara Gile	Stsr, ID	
82.	Meredith Swassing	Boise, ID	Need to give more information about the negative impacts before pursuing this. I do not want individuals who own homes near the fly zone to have unbearable noise, added pollution or their property devalued.

88.	Jeff Lliteras	Boise, ID	The noise from these aircraft is unbelievable not to mention the additional security risk associated with having the US Air Force's premier fighter jet stationed at a commercial airport
89.	Gary Grimm	Boise, ID	The "Sounds of Freedom" in a liveable city could be those of bees, birds, crickets and wind and not the most expensive and loudest military F-35 jet roar that is being promoted to inhabit Boise airspace for years into the future.

91.	Douglas Conner	Meridian, ID	
92.	Terry Potter	Boise, ID	<p>I believe that it's time to take another careful look at the F-35 warplane (officially called a "weapons system"). Over the 50 year life span of the F-35, America's newest warplane, we will spend \$1.4 trillion (\$1,500,000,000,000) on production and maintenance of this one weapons system. That is enough to feed all the world's hungry (\$30 billion per year) and provide everyone on earth with safe drinking water (\$11 billion per year).</p> <p>How about projects that the American people truly want and need – restoration of century old urban transit systems, upgrading airports to world class standards, developing accessible and reliable intercity light rail, replacing corroded aqueduct systems, restoring our national parks, insuring the safety and integrity of our interstate highway system.</p> <p>General Dwight D. Eisenhower's in his Farewell Address to the Nation has an admonition for us to be wary of the excesses of the military/industrial complex. It would be clear to him, I think, that the F-35 project is the military/industrial complex run amok.</p> <p>Even short of provoking war, its production and deployment misdirects vast amounts of precious metals and fossil fuels. This stealth airplane is specifically designed for offensive use. It can carry a B61-12 nuclear weapon deep into foreign territory undetected, making its first-strike use more likely. The F-35 is a weapons system that jeopardizes peace, impairs the health of those living near its bases, and is something the world can't afford. It weakens our ability to address human needs and heightens the risk of war. It is not needed by the Idaho Army National Guard who already knows that their future lies in drones.</p> <p>I am personally urging all to continue to talk to our congressmen about the human and societal need to halt development on this offensive weapons' system.</p>

96.	Ann Lyon	Boise, ID	Children, plants, and animals live in Boise. The noise pollution from the F35 fighter jet is over whelming and breaks the soul. I do not agree with creating that kind of loud pollution over Boise, Idaho.
97.	Tracy Rowe	Boise, ID	We live near Overland and Latah, and the existing airplane noise is pushing too much. Noise is the first concern. Plummeting property value is the second.
98.	Mike Flume	Boise, ID	Loud noises. Property value. Quality of life. Support South Boise.
99.	Patti Brady	Boise, ID	These planes will be in the heart of Boise City, disrupting thousands of lives with the extreme , unlivable loudness of these planes. Also, the daily sonic booms that will be heard throughout the city is unacceptable. All of the politicians in Idaho do not live anywhere near the airport, thus the political sell out for money. At the expense of the citizens of Boise, how much money is enough for our city and state? If these planes are brought here, there will be no going back. These planes will be here for 30 plus years, to satisfy the state and city coffers. Unacceptable!
100.	Scott Taylor	Boise, ID	On and off for my fifty three years, I have lived around noisy military aircraft. I do not want another, even louder plane, stationed in my backyard. Put them in Mountain Home where they belong. And no, I do not care if the Air Force and the National Guard do not get along. Their problem is not our communities problem. Furthermore, the politicians who feather their underwear with this decision are so disingenuous - ever notice how we haven't had a 9:00 am Sunday morning demonstration with a pair of these planes doing touch and go practice for an hour so all of us could decide based on a real life encounter? In the absence of a demonstration by those ROARING turbines they say, "Don't worry, we'll be fine with your deafness."
101.	Priscilla Allen	Mtn home, ID	Im originally from duck Vallley reservation. This will impact the already problem,there. With sonic booms, and low flying aircraft. It will affect wildlife, cattle, horses thar have inhabited owyhee mountains. NO MORE JETS.

107.	Kathy Scofield	Boise, ID	There are several Elementary Schools adjacent to the airport, Jr. High Schools, and High Schools in the direct impact zone! Hillcrest Country Club which hosts the Boise Open, a huge financial contributor to our community and hundreds of homes and families will be negatively impacted by the noise. Please reconsider this detrimental impact on our community's ears, homes and lives!

142.	art berry	Boise, ID	Subject: Trojan horse call fired plant replace Boise airport? Wow! What an opportunity for Idaho. All of our politicians and business leaders are salivating and spending hundreds of thousands of dollars of taxpayers money to convince us this Trojan horse coal-fired plant that would supplement the airport will have very very minimal air pollution impact on our community. They're telling us the very infrequent projected 7200+ annual air pollution emissions() are just only "technically" in excess of considerably unhealthful levels and will only cause temporary minor inconvenience to our children and lifestyle. That's why we have houses, shut yourself up indoors like we all enjoy doing during our winter <i>(continues on next page)</i>

Nobody enjoys the outdoors here anyway Think of the civic pride it will create with those smokestacks visible everywhere in the Valley and the resulting smoke pollution as evidence of our ingenious shortsightedness. Those 7200 times a year when you will have to drop what you're doing to let the air pollution subside will give you such a warm feeling that you have truly helped our government. You know a positive feeling like when the government gave us internment camps and unnecessary wars. Think of the property value enhancements. With the government studies indicating hundreds of buildings to be deemed "unlivable" the construction industry will be crazy busy and have an opportunity to charge consumers anything they can and will drive up housing costs and eventual taxable values. It will also lessen the congestion in greater Boise when people simply move to Mountain home to avoid these problems.</p> <p>Our tourist industry will be a real winner. People will come from everywhere to enjoy the coal fire plant. Our parks and outdoor areas will not be congested with kids and older people staying indoors and not harmed by the unhealthy air pollution. Idaho will never be the same again!</p> <p>The economy will boom(more on that boom stuff later.) The potential 75 new jobs created certainly help less than .001% of the community, but at what cost to the rest of us? Governments are in the business of creating growth and not coping with the negative side effect creates. Besides who doesn't like unhealthy pollution? If you can't trust the government and big business then who can you trust? Where are the trust -worthy community stimulators like Bill Agee from Morrison Knutson and Larry Johnson from Albertson's when we really need them?</p> <p>Back to the Trojan horse. Please re-read this and substitute "F- 35 mission" for "coal fire plant" "and"noise" for "air" pollution. Check www/stoptheF-35s for the F-35 sprints that has devastated Burlington Vermont. P. S. No malice is meant to our great military/business community. Your concerned neighbors are trying to have you look past the "patriotic Trojan Horse" and think about the disastrous consequences to the entire valley.</p>

152.	Jain Tremmel	Boise, ID	These jets do not belong in our city! The noise and air pollution will diminish the quality of life here, not enhance it. The jets we already have coming out of Gowen Field are noisy enough and that is nothing compared to the noise pollution these will produce. There is a AFB nearby called MOUNTAIN HOME. If you must bring these jets to Idaho, send them to the proper place. Listen to the citizens of Boise and forget about your wallets for once!!!

168.	Ted Jewell	Idaho City, ID	It's a quality of life issue. Increased noise and the associated stress plus the stress of the valley taking a more pro-military position for the economic benefits and associated tax revenue sacrifices too much of what makes Boise and the valley a great place to work and live.

177.	Marley Marshall	Boise, ID	I would like to continue living I my bench home for years to come.
178.	John Post	Boise, ID	As a retired USAF and airline pilot with 30+ years of flying jets, I can verify that the F-35 will bring back memories of the RF-4 and make Boise less livable. It's a stupid idea to base them at Gowen. If the IDANG gets the F-35, base it at MHAFB. Maybe find a C-130 firefighting mission for the IDANG?? Be smart about this!
179.	Joan Scofield	Boise, ID	If the F35s are the right move for Idaho, put them at Mountain Home AFB, not anywhere near Boise City.
180.	Amy Underwood	Boise, ID	This is not a goid choice for a family oriented community who's airport is part of the city and the flight patterns directly affect much of the population.
181.	Sharon Graham	Boise, ID	Would like to retire in my home near airport. Noise pollution is out of the question.

184.	Danette Henderson	Boise, ID	Boise has an incredible quality of life. Allowing this project would greatly diminish it. An urban setting is a terrible choice for these military planes.
185.	Julia Mulligan	Boise, ID	As a resident of the Bench this would impact my family's health and happiness. My children are very sensitive to noise and this jet is too loud to be flying over a residential area. It needs to be in Mountain Home- there is absolutely no reason for it to be in Boise.
186.	LaRinda Meinburg	Boise, ID	Boise has grown too much around the base for this to be a good match. The impact on the community is too great. It is time to listen to your constituents who live in that community.
187.	Robin Herche	BOISE, ID	I love the Air Force presence in Idaho (in Mountain Home not Boise) I've recently retired after 34 years and paid off bench house. I feel cheated to not be able to enjoy my time in my home because of deafening jet noise throughout the day. I'm also fearful of my property value declining as a result of that noise as well.

191.	Leah Cothorn	Murfreesboro, TN	I grew up in Idaho, lived in Boise for many years, and have family and friends living there. Over the years since I lived there Boise has made a remarkable transition from indecision about the city's growth, character, historical and recreational focus to become a thriving and energetic recreational, artistic, and health focused community. All of these factors and more are surely foundational for the city's economic health. And, good grief people, there IS an airforce base right down the road...certainly the most appropriate place for military aircraft.
192.	Rick Lierz	Boise, ID	For those of us who live reasonably close to the air strip, F15 noise levels have been unbearable in the limited times they have used Gowen Field. I can't imagine if that were permanent, let alone how it would be exacerbated by the noise level of the F35 squadron. There has to be a more sensible solution that will not harm quality of life in Boise and protect the economic base Gowen provides for Boise. Right now it certainly feels like the Air Force has the full court press on the Boise political officers and state representatives.
193.	John Wheaton	Boise, ID	We don't need this kind of expansion of aircraft operations here in our area. Economic growth can be acquired in other ways. This is not critical to keeping Boise livable. It detracts from that.
194.	Mary BEth Chandler	Boise, ID	This makes no sense to add noise pollution as well as air quality compromises in a "livable" city when we have an air force base 36 miles away. There are other missions the IDANG can explore, right? Fighter jets belong in fighter jet territory, and Boise is not it! If it's truly about economics for the state, then Mountain Home should be strongly considered as it's still Idaho..... I also believe the other finalists are more qualified and suitable to the mission
195.	Jamie VanEaton	Boise, ID	Mountain Home would benefit from the F35s, and all of Idaho wins, too.

199.	Dave Kangas	Boise, ID	The f-35 is not the only option available. Over 70 years and 11 different missions the Air Force has always found something to base at Gowen Field. However for the local administration this is the only mission they have lobbied for. The process is messed up, as the public apparently does not have a voice in this issue, or does it?

207.	Diane Wilson	Boise, ID	I lived here my whole life, never have i seen total disregard for citizen input. No response for tax dollars spent. I want to live in my neighborhood without decreased home value, noise pollution and negative environment impact.
208.	Barbara Mahaffey	Boise, ID	We live in one of the best cities in the country and I feel we are in serious jeopardy of changing that by allowing the F35 into our city. There are times when the aircraft that fly so close to our city now increase the noise level beyond where you can carry on normal conversation; the F35 aircraft would make homes uninhabitable. I feel our Mayor and Governor are selling out our beautiful community and our residents. Please, please do not bring these aircraft in.

212.	Jamie Bothwell	Boise, ID	Bad call Mr. Beiter.
213.	Bob Minton	Boise, ID	The F-35 is the loudest fighter jet ever produced. The Air Forces own Environmental Impact Statement shows the detrimental impact this will have in a number of areas in the Treasure Valley. This is simply not a good choice for Gowen Field, which could be better utilized as a cargo plane training base or other function. The F-35 belongs at a regular Air Force base like Mountain Home which is out of the way of populated areas. Remember all the times they have talked about closing MHAFB? Putting them there would solve that problem.
214.	Carl Rowe	Boise, ID	For me, the definition of "the most livable city in the country" does not include ear shattering military jets flying close to the city. We can make up any lost revenue in some more civilized way.

217.	Patrick Williamson	Boise, ID	With Boise having an airport within the confines of the city proper, the impact of the f-35 on residential real estate cannot be underestimated. Property values would suffer and it's hard to understand why the Air Force base in Mt Home would not be a better fit.

226.	Angela Fleischmann	Boise, ID	I love Boise and the Bench. The city seems to be handling the entire effort poorly, and should not have sought the jets without consulting Boise citizens. I'm extremely disappointed in Mayor Bieter and the city council. I view their communication with Boise citizens on this issue as deliberate obfuscation, and I consider their motives suspect. What special interest is benefiting at the expense of the citizens? Do future statewide political efforts depend on appeasing Republicans with demonstrably greedy "economic benefits" and "pro-military" pandering?

228.	Frances & Daniel Jones	Boise, ID	We can only see negative impacts from bringing the F-35 to Gowen Field. The city's lack of engagement with the community on this issue is a concern, too. We worry that money has gotten in the way of continuing to sustain the quality of life here.

237.	Patrice Perow	Boise, ID	Noise and air pollution, both will adversely affect me and the value of my home. As a older widow, I don't see myself moving, nor should I be forced to do so. I also don't think I should have to live with diminished air quality. Not when there are other alternatives to placing the F-35s at Gowen Field. For instance, why not place them at a less populated area such as Mountain Home AFB? Lots of open space...less impact on people and homes and then there's a the safety issue. Beside overcrowding the air space of a growing Boise airport, try to imagine if an F-35 went down anywhere along the Cole corridor where there's so much growth....the loss of life could be staggering. Boise City and Ada County residents who oppose the F-35 want answers to outstanding questions, we do not want the jets simply crammed down our throats.

Where is the concern, on the part of the local government, for our health and welfare? I say this because I live outside them impact area according to that map. At the time of publication I was able to hear jets on takoff from my homemclose to Armstrong Municipal Park. I see city support of the F-35 mission at Gowen Field as all about \$\$ and not about citizens who will be adversely affectd should the mission be at our airport.

We have lived through several changes over the years, the interstate has grown larger as well as more noise and pollution laden as it grew. We live within 150 feet from the interstate, where a "sound wall" was built. It was an expensive experiment that helps in a small way, but accentuates and amplifies sounds in other ways. I personally worked hands on, on the F-4c, and know just how loud it can be. Just imagine having loud ringing in your ears 24/7, as I and many other people do. It does wear on a person, who has that ringing every living moment, thanks in <i>(continues on next page)</i>

300.	Gary Long	Boise, ID	<p><i>(continued from previous page)</i></p> <p>part to these loud jets. We had earing protection of sorts back then in the mid 60's, but none that were sufficient to completely protect our hearing as much as they should have been. Fast forward to the present day, where we have people who should be mindful and protective of children and elderly who now face the possibility of having their lives and health compromised, their homes physically damaged, all because of people in positions of authority who can make a difference in protecting these people, fail in doing so, while they spend OUR taxpayer dollars, in the attempt to further encourage the placement of the F-35 aircraft literally in OUR neighborhoods. The F35 is a far different type of aircraft, which belongs much further away than the 1/2 mile away or so from private citizens than would be the case, if it is allowed to operate at Gowen Field. I served in the U.S. Air Force for 4 years, was in the Idaho National Guard for over 17 years, right at Gowen Field itself. Does my opposition to the F-35 make me less than patriotic? I do not believe so, as I firmly believe basing those jets close to the city of Boise, will cause great harm over time, to the citizens of our fair city, and our environment and quality of life itself. Thank you for your time... Gary A. Long</p>

302.	William Mullins	Boise, ID	<p>Because we live near enough to the airport where the noise caused by F35's will be VERY loud, disruptive and bothersome. Also, we have spent the last 20 years remodeling our home so it would bring in a good price (our nest egg), and its proximity to Gowen Field will devalue our home. The F35 is clearly not compatible with an urban environment. Mountain Home Air Force Base would be a much better option. Let the jackrabbits and coyotes deal with the noise. Boise is supposed to be one of the best cities in the country to live. Deployment of the F35's will significantly degrade this. 357.	Ann Herrington	Boise, ID	The loud noise and pollution will make Boise the least livable city. We already know that even a mile away is deafening. The F-35 should be in Mountain Home, or better yet Not on this side of the Mississippi ! Mayer Bieter stated that they would take off towards the south. (the sound is still there !) And they do have to turn East to get to Iraq, so station them in a eastern state. Not near our valley.

365.	Jess Hawley	Boise, ID	Our city Boise, and our region which includes the high mountain desert--Owyhee Canyon Lands etc are unique and precious and fragile. It is irresponsible to degrade our environment with this obnoxious noise. Idaho is our refuge and source of solitude. Stop chasing the money, demonstrate maturity and judgement and preserve this precious area we call home. Send this noise pollution somewhere else and do us all a big favor. Be glad to take any of you into Idaho"s Canyon lands so you can learn for yourselves what a treasure or city and region is first hand.
366.	Lynn Fuger	Boise, ID	I live in the flight path and currently deal with noise from planes landing and taking off. The F35's are much louder and the noise would be intolerable.

369.	Diane Krouse	Boise, ID	Because Boise has already grown enough in noise in the past fifteen years. The traffic noise is assaultive just about everywhere you go in town. And then there are the regular flights that zoom in overhead along with the military planes that add to air noise. Enough is enough. If the town grows larger, so be it. However, we do NOT need to invite any extra noise. there's too much already. Besides, if I so loved the sound of the military then I would move to Mtn Home. I've read some thorough articles on some studies done around the air pollution created by the jets. At the same time, Boise, with common inversions and lots of traffic, isn't clean enough to take on the jet's additional contribution. Boise's a sweet town. Let's keep it that way.
370.	Steve Rudd	Boise, ID	The City of Boise does not need MORE NOISE, Mountain Home Air Base is already using these planes and the base is not near a populated area like Boise. Idaho Air National Guard personnel can drive to Mountain Home just like a great many of the personnel who work there now.
371.	Eric Rothwell	Boise, ID	I worry not only about noise but also the potential for an accident. Mountain Home Air Force is a far more local logical place.

374.	Steve Jensen	Boise, ID	I am concerned about the liveability of this Wonderful City. I don't think that a Fighter Jet base in a Metropolitan area like Boise will add to the liveability of this city, but will detract from the long term unique environment that we have. If you disagree then bring a half a dozen F-35's to Gowan Field and have them do Touch & Goes at Gowan Field and then decide how you feel!! Keep Boise the best place to live in the USA! Steve Jensen

375.	Kim Coe	Boise, ID	We need a new airport as our city- like it or not- is growing. Opening a 3rd runway isn't a good option. It would still be too close. These planes may be needed for the safety of our country but they need to be based out of a true AF Base. Residents who live or move next to these bases evidently don't mind the noise. Our small municipal airport is not a place for these zillion dollar loud polluting jets.

The sound levels in the area would not only affect humans but it would also affect the Birds of Prey area and the pollution causes by the plane would also affect the environment . I question the lack of research and especially the lack of a demonstration so that everyone can know exactly what is being proposed. If our politicians, especially Mayor Bieter, would be willing to host a press conference at Gowen Field WHILE the F35s are taking off and landing, I would be willing to listen to what they have to say. IF I COULD HEAR THEM.

431.	Kristina Grimes	Boise, ID	I bought a home 15 minutes from the airport knowing that commercial traffic would fly overhead. However, commercial planes are VERY different than military planes. The issue is there are too many houses located around Gowen field and schools that would be unbearable the noise level that they would be subjected to. Property values would also drop in value. Mountain Home AFB or another place out in the desert away from urban areas would be a much better option. Commuter problems? That's an obviously lesser problem than the noise because they can be obviated. Huge noise overhead cannot. Property values will tank for just about anyone in Boise, not just those who are closest to the airport.

465.	Rebecca Hackett	Boise, ID	Noise pollution is as offensive and any other pollution. Having lived in SE Boise, I can truly say that you don't know how loud the planes can be in that area. The F35 jet would increase that noise exponentially. Please keep as much peace as we can for a city that is growing quickly.

467.	ellen meyer	Boise, ID	I believe that the F-35 belongs at the Mountain Home location where the air force base is located
468.	Gaylan Radford	Boise, ID	Excessive noise would be damaging to our children. The jet fuel is toxic to the atmosphere. The F35 has to use afterburners for take off which means that they will pollute even more than other jets. They are not suited for residential areas like Boise.
469.	Cathy Daly	Boise, ID	The planes ALREADY stationed there make too much noise. The noise rattles me awake. We have lived in this house 63 years.and cannot move.out. Just because others live elsewhere and will not be affected by the noise, it is only fair that we also should be considered for NO MORE NOISE. Thank you.
470.	Jill Gill	Boise, ID	Boise's goal to remain a livable city will be seriously imperiled by the noise and toxic pollution produced by these particular planes; and so too will the economic health of the community in terms of how these planes will impact home values, health issues, stress, businesses, schools, and the various other qualities that draw people to Boise. No military value (incl. \$ infusion) will come close to outweighing these other larger concerns--and once these are traded away, they're lost for good.

475.	Gary Richardson	Boise, ID	Noise levels produced by the F-35 are proven to permanently damage the hearing of those exposed even for brief periods. Exposure to noise above 90 decibels is known to cause permanent hearing loss by destroying the very sensitive tiny but brittle cilia, which line the inner ear. the ends of these hair-cells are stereocilia only as wide as the smallest wavelength of visible light, which when vibrated, send electrical signals that he brain translates as sounds. These stereocilia break under pressure above 85-90 decibels and cannot regenerate. <i>(continues on next page)</i>

Our Idaho National Guard unit can function just as easily from Mt. Home (and the money will still flow to our state).
482.	Alana Burke	Boise, ID	Aircraft are noisy and disturbing to our peaceful lifestyle. Perhaps more importantly, I have seen NO reasons explaining why it would be important for it to be here.
483.	Judy Thorne	Boise, ID	Since one of our Mayor's goals is to 'make Boise the most livable city', this is in direct conflict with that philosophy. Noise and environmental pollution are not what contribute to a healthy community!
484.	Mike Shumann	Boise, ID	When we bought a house on the Bench, we knew that the airport and Gowen field were nearby, and that we would hear some planes. That's fine. The F-35s however, are a completely different story - they are several times louder than the A-10s, and if they are just effective for our national defense at any of the other four finalist sites, they would be better there - not near a residential neighborhood!
485.	Teresa Grimm	Boise, ID	The decline in quality of life due to noise and air pollution because of F-35s flying above us is unsustainable. I understand that the airforce, and all services need training grounds to be an effective defense for the population of the United States, but there is an airforce base less 40 miles from Boise. That would be the appropriate area for military jets.

517.	Bob lanson	Boise, ID	The basing of EXTREMELY loud F35 aircraft at a urban airport such as Boise's is clearly inappropriate. The airport is simply too close to the city. Basing of other aircraft (A10, helicopters, etc) has been supported and can be considered appropriate. These LOUD aircraft will simply deteriorate the quality of life that Boise residents currently enjoy.

The current commercial and military jets are already loud enough, especially the military jets which are much louder than the FedEx or UPS jets that take off and land. 542.	Gwynne McElhinney	Boise, ID	As a lifelong educator, I am fully aware of the toll that exposure to the noise level generated by the F-35 will take on children's academic progress. Half of the Boise School District's schools (elementary, junior & senior highs) are located within the hazardous noise contour of this jet's take-off and landing zones. Based on research, cognitive impairment, learning disabilities and cardiovascular problems are all associated with noise-induced hearing loss. Why handicap hundreds of students for a lifetime when it's totally unnecessary? Base the f-35s at a site that doesn't put residents at risk!
543.	Susie Kemp	Boise, ID	I grew up in a house off of South Roosevelt and my parents are still there. Not only would their house be unsaleable--as would hundreds of others-- if the F35's came here, the noise pollution is too much. Too loud. Well, they say the "average" is so many decibels that are within the acceptable range, but that is over 24 hours. These jets are loud. And Mountain Home AFB isn't that far away. (Though they aren't one of the five finalists) Keep them in the desert.

561.	Tamara Chalifoux	Boise, ID	I do not want to here all the noise when I'm trying to relax in my yard or my home. Many people are already selling their homes because of the noise and I do not want to be forced out of my home. It is my right to live where I choose and enjoy my peace at home. These Jets do not belong here. Boise is one of the best places to live to raise a family and I do not want to listen to these Jets constantly. I'm a native of Boise, Idaho and I am strongly against these Jets ruining our quality of life in Boise. Take them elsewhere.
562.	Jennifer Fife	Boise, ID	Too noisy and unnecessary for our area. This belongs in Mountain Home.
563.	Kyle True	Boise, ID	I live close to the airport and I'll be damned if I have to listen to these monstrosities roaring in all the time. What a ridiculous waste of taxpayer dollars that these pointless things were ever built in the first place.
564.	Kara Jackson	Boise, ID	As everyone has mentioned, the noise level is going to have a negative impact on property value for a large residential area of Boise. Either a runway further out needs to be built, or this needs to go to Mountain Home. The economic benefit, if moved to Mountain Home, would still be substantial for the Treasure Valley.
565.	Dave Earnest	Boise, ID	Don't want loud jets at Gowan! Go to Mt Home. Out in the desert. Not in town. Geez.
566.	Kate Nelson	Boise, ID	We have invested so much into our home. Our son is already affected by loud jets (which we couldn't have guessed when we bought the home as a young couple). We don't want to lose our investment by decreased home values. We don't want to leave our home. We don't want the quality of our lives to be diminished. These are not fabricated complaints. Please listen!

568.	Joe Baldwin	Meridian, ID	The proposed mitigation to the extreme noise generated by these aircraft - buying homes near Gowen Field, is laughable. 617.	Sheryl Tomlinson	Boise, ID	Please read op page dated April 10, 2017 in the Idaho Statesman. The noise created by the F-35's will be intolerable and damaging to physical and mental health but even worse the air pollution created by the F-35s (see Air Force environmental report "F-35 Training Basing:Environmental Impact Statement, 2012")will be far more damaging to the health of our citizens. Pollutants such as volatile organic compounds, carbon monoxide, nitrous oxide, sulfur dioxide, etc. are not only damaging to all of us but are especially damaging on the developing brains of our children and teens. We need to look out for their future because THEY ARE OUR FUTURE and IT IS OUR DUTY AND RESPONSIBILITY NOW TO PROTECT THEM..

The impact of decreasing their property values will have a ripple effect that could impact them for the rest of their lives. This is ridiculous it's going to ruin the quality of life in the Boise Treasure Valley and These planes should be out in Mountain Home at the base. The F-35's are five times as loud as the F-16s . Forget the amount of income that they believe that this will bring to the Boise area . It's harmful to our quality-of-life and will de-value most of the homes on the southside of Boise Let's do this... how about if we host an open house and allow the citizens of Boise to actually hear these airplanes before a decision is made . Why don't we let the general public make the decision ? Hey we actually live here !

Items on shelves and windows rattled, floors shook, it was painful to hear, especially if the windows were open. The sound was particularly problematic for my pets. Considering how many homes would be condemned by the noise, I do not feel that the F35s bring enough benefit to the community to counter the harm.
650.	Jennifer Patrick	Boise, ID	Noisy Boise!!
651.	Elizabeth Cave	Boise, ID	I'm home all day, so I'll be bombarded with noise. We used to live where our backyard was next to the freeway. Noise literally drove me crazy! It terrified our animals. When the jets flew last summer, our windows shook, you couldn't hear anyone when talking outside, and it was just plain scary! It was horrible! NOT IN BOISE! Boise is too great for these jets. Please NO! I'm begging you not to ok them.
652.	Greg Little	Boise, ID	I feel the noise will be detrimental to the good of the community and to home values of a large part of the population surrounding the airport and flight paths of the jets.

654.	Jacquelyn Hanners	Boise, ID	I can hear everything that happens out at Gowen Field. I don't mind hearing Reveille, Morning Colors, the National Anthem, and Taps every single day, but having my roof shake every time a F35 takes off is another story. Having that type of noise that close to residential areas is not responsible nor it showing that the Air Force is a good neighbor. 690.	Beth Maucere	Boise, ID	I am a Veteran of the US Air Force, so loud aircraft is something I've dealt with, and gotten used to, since 1988. When I purchased my home in 1996, on Boise's West Bench, I knew the airport and Gowen were nearby, and it's been a tolerable amount of noise (even on drill weekends) for the last 21 years. The addition of the F-35s, however, will create a marked increase to the noise level of our city. I also have my own a small business based at my home. In my business, Reflections Float Center, we provide a quiet, relaxing, and healing service that helps many people in our community - including several Veterans getting help for PTSD. I already have to limit some of the float appointment times (to maneuver around drill weekends and the F-15s, which I knew from the start). But with the activity and noise, that will certainly accompany the F-35, I fear my Woman-Veteran-Small-Business will suffer and possibly go under. This will take away a therapeutic option for some of our most traumatized service members. I also work full-time elsewhere and cannot afford a stand-alone building, for my fledgling business, far from the noise. Please consider more than profit when making your decisions about our great city! Please do not bring the F-35 here to Gowen.
691.	christine yardas	Boise, ID	a positive quality of life is important to all of us, and if these jets are introduced into our community, we will see our quality of life diminish due to noise pollution. 696.	Donna Yule	Boise, ID	I live on the bench and they are just too noisy.
697.	Barbara Gustaveson	Boise, ID	This type of aircraft should be operating from an air force base, not out of a regular airport. This is not normal operation, especially for an airport this size. That type of noise is considered detrimental to health, and is a form of pollution.
698.	Donna Carbonaro	Meridian, ID	I love living here and I do not want to move!
699.	Margaret Koger	Boise, ID	I'm against the physical and mental damage to our citizens who live near Gowen Field. The children at Owyhee School and their parent will suffer as well as the teachers. I am shocked that the leaders of our city show such willingness to degrade the environment of a community within the city. Let's stop the project and move on. Boise is better than this. We need green jobs, not fighter jet money.

We have 2 home based businesses which would be negatively impacted by the additional noise. Our property value would also be negatively impacted. Why aren't they going to Mountain Home? Pleasr put people over profit for once!

Boise is currently investing in the very neighborhoods that the jet noise will impact. This seems counterintuitive. Let's continue to model why Boise wins titles of best place to live.

763.	james tomlinson	boise, ID	Our home is parallel to the runway and noise is very bad when we have F15s leaving the airport. I can only imagine the additional noise with the F#%. Our dog runs for cover, inside our home, from the loud noise. We cannot hear a conversation or television during take off. Also, we manage two large apartment projects at each end of the landing/take off patterns. Our apartments will be virtually unrentable with the noise from the F35s, particularly on weekends.
764.	William Bartlett	Boise, ID	When F-15s fly over our house, the noise is unbearable and a major disruption even when we are inside our home. The F-35 is supposed to be louder than the F-15 and therefore the noise will be unacceptable.

780.	Terry Eldredge	Boise, ID	There are better options than placing these jets in a metro area like Boise. The city of Boise is only concerned about \$\$\$ vs the actual quality of life for their citizens and those of the other close communities.
781.	Thomas Berry	Boise, ID	Obviously noise. Gowen field is no longer suited to the mission of basing modern fighter jets. Development of residence, schools, churches, community centers, even commercial around the airport has changed the suitability of certain aircraft at Gowen. The F35 is NOT suited for Gowen Field. Boise has grown and changed. Gowen Field will have to change its suitable aircraft.

Shame on the City of Boise! Their is a lot of Desert around this area that would be great acceptable land for the presence of the F-35 missions.
787.	Dick Miller	Boise, ID	The noise would be intolerable and I do not want any more war machines in our city.
788.	Martha Carty	Boise, ID	The F35 should not be placed in or around the city of Boise. The F35's are suitable and should be placed at the Mountain Home AFB. Our leaders are concerned that the National Guard men and women would not drive 90 minutes to and from Mountain home AFB. You do not want them to be inconvenienced but rather you want to destroy our beautiful city of Boise with the horrendous noise of the F35's.I do not believe any the guard personal would quite just because they had to drive 90 minutes one weekend a month.Please, keep these planes out of our beautiful city.

If the mayor and other leaders are so excited to see the F-35's come here let them bring some in for a week and let us hear what they will do. Let the mayor and governor move up to my neighborhood. 797.	Peter Paradis	Meridian, ID	<p>Several years ago we visited Virginia Beach, VA. It was truly a lovely beach with an engaging mixture of shops and restaurants along its boardwalk. It is also approximately 3.5 miles east of Naval Air Station Oceana. I believe they were flying F-18 aircraft, but the noise experienced on the beach actually diminished my enjoyment of the overall experience. The F-35 is louder than the F-18 by at least a factor of two. Not a good fit for an urban airport, especially with 2000 homes threatening to crowd into Syringa Valley immediately adjacent to the airport.</p> <p>The cheerleaders also talk about the countle\$\$ benefit\$ the F-35 will bring to region. I don't know if anyone is paying attention, but the economy in our region is already overheated. The surface roads and arterials are nearly gridlocked twice a day and one can scarcely navigate anywhere in the valley without having to do battle with gravel and concrete trucks. Adding to what we are already experiencing is akin to throwing gasoline on an already hot fire.</p> <p>Growth for the sake of growth its the ideology of a cancer cell. 816.	Melissa Winberg	Boise, ID	The noise will negatively affect quality of life in Boise, especially near the airport. F35s should not be brought to residential areas. The noise mitigation efforts are already insufficient and will do nothing to minimize the increased noise from F35s.
817.	Charles Honts	Boise, ID	I live in Boise because it is one of the most livable cities in the US. The introduction of these incredibly noisy machines into our urban environment will be a disaster. We planned to retire and stay in Boise, but we may change our minds.
818.	Toni Sutton	Boise, ID	Boise already has a huge inversion problem, so we should be decreasing pollution, not increasing it. Plus the noise of these jets is deafening--the legislature was given information that 105 homes would be CONDEMNED because of noise levels. Throwing people out of their homes should NOT be done lightly, if at all.
819.	Sheila Matthews	Boise, ID	The noise and pollution generated by the F35 jets would significantly impact southeast Boise turning a beautiful, peaceful area into a neighborhood where the air is more polluted and the noise level makes all outdoor activities untenable. Already the noise from the Air Guard makes it hard to be outside when the Guard is doing active training during summer months.

862.	Dawn Rausch	Boise, ID	I don't live far from the airport. From all the research I am finding not only is the noise from the F-35's going to be 10 times worse than the current fighter planes going out now, but now the value of my property is going to drop immensely. If I choose not to sell my home then I'm going to have spends thousands to upgrade my home in hopes the noise will be somewhat tolerable. This isn't what Boise needs. Our valley is too small for something like this and our quality of life will drop due to pollution and unwanted noise.

My problem with F 35 and the noise pollution and danger of bombers over Boise is this: my tax assessment just came and they claim my property is now worth 30,000 more than 1 year ago. It isn't worth a penny more than last year. With F35s dis-gracing our city with noise, property values near the airport go down considerably (mine)and the livability of Boise will be severely compromised. The noise/loudness levels is NOT suitable for a city like Boise when the option of putting it 60 miles away at the Mountain Home AFB is better. It will be dangerous if a plane crashes in an urban area. And the officials that want it only care about money, not the environmental consequence and problems it will cause. Why are they so afraid to conduct test flights to show us the noise and pollution levels? And the economic benefits do not take into consideration that costs to the residents. . It is a bad idea

945.	Jack Jensen	Boise, ID	This type of aircraft doesn't belong so close to a population center
946.	Jennifer Brodie	Boise, ID	having the F35s would likely pollute the air and create noise pollution over residential areas. This would affect people's quality of life. Having Fighter jets here would support war, not peace.
947.	Donna Selle	Boise, ID	It seems there is a better option that will not negatively impact residents by basing the F35 fighter jet at the Air Force base in Mountain Home. At least, better planning for adverse effects is needed.
948.	Judi Shipley	Garden City, ID	This will devalue our quality of life and our health and our property values.
949.	Katie Berry	Boise, ID	The ear splitting noise from the regular commercial jet flight pattern and then the F10 jets is horrible! Apparently the F35 jets are even louder?! We have been renting this house for over a year and have been offered to buy it, but we are definitely not going to because of the current airport noise. The daily noise pollution is so annoying and definitely Body jarring at times. Even if the owner discounts this house for purchase , we wouldn't buy it because of the unhealthy amount of noise pollution from the commercial and military jets. I don't even want to imagine how awful the noise will be when the F 35s start flying. Why in the world is this project not being done in Mt Home with less population, less homes and more empty space? One of The largest growing economies in our country coming out of The Great Recession with still affordable housing ruined by ear splitting military fighter jets zipping around? I grew up in the shadow of Ft Ord in California listening to machine guns, mortars and C130 transports occasionally coming in and that sound pollution was nothing compared to the torture of Air Force high speed jets drilling our ears, bodies and brains daily. If based in Idaho it should be at a site much further from major population centers (not Boise). Some have cited patriotic pride as a reason for F35s at Gowen Field. With respect to those serving in the Air Guard, I say it is patriotic to want to protect the people, natural spaces and wildlife in our community and surrounding areas from increased noise and air pollution.

960.	Tracy L	Boise, ID	Commercial property owners please take note! Boise City must take account of detrimental impacts of very loud sounds in business activity, as well as schools and homes, and safety operations. It is not merely casual conversation that is halted by military jet noise. I work in an office building on Elder St., at the Vista exit, across the interstate from the airport. When the navy jets were in Boise last year, I experienced a daytime takeoff that was so overwhelming, eclipsing all sound/ability to hear or communicate, it stopped all work for over over a minute in duration. Even my mere typing stopped as the sound shuddered through my co-workers and me. Perhaps staff in meetings, in trainings, working with customers, or in conferences at nearby hotels, would be patient to sit in silence through the noise, but the off site world of teleconferences and customer calls would move on without the staff of these Boise businesses. I experienced the jet noise to induce temporary deafness when sitting in the middle of a commercial building, so what is the safety impact of over a minutes time of deafness for a police officer, a fire fighter or ambulance personnel? I am certain I would not have heard a siren, a car horn, or any kind of call for help. I would not be able to call 911, or would not be able to hear directions from a 911 operator, or even a phone call to me for help. 960.	Tracy L	Boise, ID	<p><i>(continued from previous page)</i></p> <p>but two evenings last week, I had a similar experience of overwhelming military jet noise. There is no comparison between the sound levels of these new jets and the current A-10 and commercial jets I routinely hear. In comparison, the current jet noise is only a purr. I was woken up about 9:45 by a jet the first half of the week, and stunned around 7pm, later in the week, when two running lawn trimmers, traffic and every other sound was obliterated for over a minutes time. I was near an empty play area and would not have been able to call to a child or hear a child in distress. That time I did see the small/distant triangular jet turn to the south after take off.</p> <p>The new jets would limit or even destroy Boise's ability to grow because development to the east, south, and west would have to leave a more enourmous hole around the airport and runways. Would Boise even shrink as businesses and residents would be forced to escape the noise?</p> <p>I get the benefit of an expanded air mission for the Guard. I also enjoy having the Guard at Gowen Field. Still, the jets are completely innapropriate in the tiny footprint of Idaho's capital city. Boise does not depend on the the jets for its livelihood. In fact Boise suffers from a lack of available workforce, compounded by very little effort being put into affordable housing. Boise city made no effort to encourage development to the east of the city. Perhaps if new jets for the Guard were at Mountain Home, which does depend on the military for its livelihood, technical business and developers may find value in building to the east of Boise.</p>

The Idaho Air National Guard supports F-35's at Gowen Field to avoid moving to an air force location that is fully capable managing the challenges of this aircraft. Mayor Bieter, Governor Otter, the Idaho Congressional Delegation and the Statesman Editorial Board support the F-35 at Gowen because this serves their political and/or businesses interests in supplying fuel or other services to the air guard. They also support making many Boise neighborhoods unlivable due to F-35 full performance and afterburner takeoffs that would deafen families. The F-35 aircraft is the most efficient military aircraft for converting jet fuel into pure pandemonium. High-performance military aircraft have no business flying into or out of an airport situated a short distance from residential areas. When one crashes - and one will - how many on the ground will die when the pilot punches out and his aircraft goes into a school or neighborhood. Where will Beiter be then? The reason we live and enjoy the Treasure Valley is because of the quality of life, being able to spend many hours outside not only at out lovely home but also in the surrounding ares. My parents lived more than 5 miles from Luke Air Force Base for more than 17 years. When the F35's came in they hated the noise. That is more than 5 miles, folks. What are we thinking? Boise has an abundance of Life, Family and Natural fulfillment in the hills surrounding our town, to the extent of Red Fish lake (I have witnessed low flying, high speed maneuvers directly over my head that came so fast as to scare our dog, at that location.) The sound carries for tens of miles. It isn't about a decibel rating that makes life unbearable to those nearby; It's about having a sound that is so totally unnatural, aggressive, and out of place as to devalue any experience. The natural foothills that encompasses Boise are a natural amphitheater. Quality of life - VS - City/County/ State revenue. The Mountain Home Air force Base operated by the US government is the place for military training jets. Idaho still gets the money. Mtn. Hm. Step UP! (oh; the city does not have the infrastructure). - Boise is a community to serve the residents and public. Not a military training base.

1,055. Nathan Sarve	Boise, ID	I want Boise and especially the bench and South Boise to be a place to raise families, to have a high quality of living. The F-35's pose a threat to that reality. They will make the areas affect by F-35 action to diminish and that will be a loss for the community. If Boise wants to host the F-35 program they should build an airport farther out that would also allow for other aircraft and would make sense for the business community and overall area needs.

Not only do my children have to suffer this noise when they are at home, but also when they are at school and even playing at the park. The fact of additional air pollution has been largely ignored. 1,096. Patricia Barstow	Boise, ID	<p>The noise levels from the F-15's that fly here from Mtn. Home AFB is bad enough to stop conversation and rattle windows (perhaps even broke some window seals), and I understand the F-35 is even louder. We have a Metropolitan Airport in Boise that handles commercial flights, light airplanes as well as the A-10's from Gowen Field, which most of us have no problem with their noise. The majority of us living in close proximity to the airport cannot understand why the F-35's can't be based at Mtn. Home, some 20 air miles away that does not deal with all the additional flights that we currently have in Boise. They are not located near neighborhoods as well. I believe they should find another area to base the F-35's, which also don't have a very good flight history, reading that they tend to fall apart in flight in some instances and I don't want them on top of my home. I'm sure there are bases that are not located so close to neighborhoods where the F-35's could be stationed and not disrupt the air noise for quite a distance both up and down from the current air path annoying so many different neighborhoods. Please don't let them come to Gowen Field in Boise, ID. I also don't want to go deaf before my time, and to have my pet terrified and stressed out from the noise every time one flies by. This will also de-valuate our homes in this area should the F-35's come here.</p>

When the F-16 fighter jets stationed at Portland Oregon were temporarily located at Gowen Field when the runway there was under repair it was horrible to be outside during operations. Station the F35 in a more isolated area. There are plenty of under utilized military bases to choose from.

The recurring high levels of air pollution during summer temperature inversions will be exaggerated by the pollutants from the F-35. The noise levels from the F-35 will reach far beyond the current noise contours and impact schools and businesses as well as homes near BSU and Southeast Boise. When property values fall in the highest impact areas then the remaining property owners will have higher taxes to over come the short fall.

If I don't like it here it must be UNBEARABLE in the areas of Boise nearer the Airport. There is no justification to destroy the value of all those homes due to the unlivable conditions imposed, for the placing of the F35s in Boise ... particularly when there is a community already set up to support them ... Also concerning is the refusal of the proponents to engage in any meaningful discussion or debate of the merits of basing F35 Fighter Jets at Gowen Field. What could be the downside of letting both sides of the issue present their argument in the same meeting?

1,461. Cecilia Jones	Boise, ID	It's unfair for the neighbors of the airport to bear the brunt of somebody else's profit. I don't want to have to listen to the noise.
1,462. Alexis Tatro	Boise, ID	My childhood home I grew up in is on the Bench area, my son goes to my old elementary school on the bench. Both of these places that I hold close to my heart are at ground zero and would be the first neighborhood to go. We support our military but not this option.

1,465. Kristen Hill	Boise, ID	The bench is my favorite part of Boise. It is where I live and will continue to live as long as I can in Boise. This significantly threatens the livability of the bench, and will force many people out of their homes and potentially out of the city altogether.

1,466. Dakota Reed	Boise, ID	We bought a home in SE Boise to settle down and start a life together in a quiet neighborhood where we could maybe raise a family. If these jets come to our city, our daily lives will be affected and our quality of life will decrease. This was not our choice nor was it in our plans and it seems unfair that we should suffer whatever consequences without getting offer input or opposition. Please consider other alternatives.

However, the kind of noise that will be caused by the F35s will not only making living here extremely difficult but we will not be able to sell our house next year as planned because no one will want to take on that situation. I also work from home as a customer service call center employee and this situation will also jeopardize my job, as the noise would make it unsuitable for me to continue working as I am now.

1,496. Susan Olszewski	Boise, ID	I live in the area that will be directly impacted by this decision. I have seen an impact study from a previous proposal for other planes that would deem my house AND a rental property I own unlivable. When the planes from Mountain Home were taking off from Gowen while their runway was being repaved, I could not be outside when the planes were on maneuvers. I have a child about who's hearing I am concerned and clearly property values will be hurt. Until we see a credible impact study related to the F35s, it is egregious to throw out assurances that these planes flying out of Gowen will not be harmful. What assurances will we have that the negligible impact touted by the spokespeople for this initiative have merit? I listened to the planes go over my house now..... I find it hard to believe that any of the proponent of this initiative live in the path that will be impacted. If there is one, please raise your hand so that I have more confidence that you truly believe what you trying to sell to the public.

1,559. Michelle Crawforth	Boise, ID	6-30-17 The F35s coming to Boise ... not a good idea. We tax-paying citizens are NOT getting FACTS from our elected officials so that we can make a good decision, like having REAL F35 jets fly in & out of Boise for a month or so. . The fabulous outdoor quality of life, clean air, vibrant downtown activities, moderate home prices or business locations that businesses have relocated here for will be negated by the increased noise, poor air quality, loss of outdoor amenities, etc -- how much tax \$\$\$ will be lost when these "impacted" homes & businesses are forced to vacate AND when the businesses move out of Boise & take their workforce w/them. <i>(continues on next page)</i>

- . Info from those "in the know" on \$\$\$ spent to rebuild schools, churches, homes has NOT been addressed adequately.
- . Nor the negative health issues (hearing, breathing, brain damage to children & adults alike) to ALL Boise & nearby Cities that will come w/ that amount of noise & fuel particulates.
- . Will Gowen Field personnel will lose their jobs & the jet maintenance will be contracted out? THAT has not been mentioned -- but has been "hinted at."
- . It's not just Boise's quality of life that will be affected. Meridian, Nampa, Caldwell, Eagle, Kuna PLUS the wildlife & Birds of Prey area will suffer loss of their native hunting/nesting lands.
- . What about the poor farm animals -- will they go nuts?
- . Will farmers quit working their lands?
- . The loss of income to businesses and attendance at The Boise Open Golf Tournament (IF the Tournament is still played in Boise!), the Boise State Football games that probably won't be televised because of the F35 noise (TV coverage moneys will cease), the outdoor sports & other events for all schools will become history.
- . Does this mean that the City Council, Mayor, & Governor will allow triple tractor-trailer trucks to use downtown streets any time they want? Doubt that. WHY NOT? It's about as senseless as having the F35s in such a populated area.
- . If all the new hotels close shop because there are no people to fill them (because of the noise factors), the businesses & City will lose tax & other moneys.
- . What about all the small businesses who will also be ask to vacate their locations (along w/ thousands of homes) -- will they be able to move or rebuild (thus stay on the tax records)?
- . Will Micron be able to continue business in its current location OR will IT MOVE OUT OF STATE? It only appears to be on the "outskirts" of the dB area -- but will the vibrations from the F35s allow them to continue manufacturing their delicate products?
- . This HAS NOT BEEN WELL THOUGHT OUT. The closeness of these loud F35s will minimize the "supposed \$\$\$ & increased jobs benefits to Boise." Who will pay the property taxes on those condemned homes & businesses? . .
- . The Mayor, City Council members, & others who support this? I doubt it. Will the other areas of Boise be able to pick up the lost-tax moneys in THEIR tax bills. I doubt it. Oh yes, I need MORE FACTUAL & ACTUAL "HEAR / SEE" EXPERIENCE to believe what the "officials" want us to believe about the F35s. Don't think that can be accomplished. The whole Boise Valley will be negatively
