

Speak Up for Healthcare in Boise!

St. Luke's plans to modernize our Boise medical center to meet the region's needs for many years to come. In addition to providing our patients with the safest and highest quality care, upgrades to the downtown campus also include careful consideration of the safety, connectivity, and flow of traffic for drivers, cyclists, and pedestrians.

If the Boise City Council votes against our development plan, major services will be migrated over time to Meridian, which will affect your local healthcare and the Boise economy. These include:

- **Our main cancer center**
- **Our major heart facilities**
- **Idaho's only Children's Hospital**
